Summary

I am a data analyst who loves digging into datasets to spot trends that boost revenue, cut churn, and improve user retention. I handle everything from pulling and cleaning data to running in-depth analyses and setting up automations that make processes smoother and faster. With hands-on experience in SQL, Python, Tableau, and Excel, I've tackled predictive modeling, API integrations, and stats to help drive real business growth. Through volunteer work, competitions, and my own projects, I've honed these skills. I am committed to continuous learning and helping teams make smarter calls in dynamic markets.

Experience

Volunteer Data Analyst

2025 - Present Remote

- Contributed to the "Advocating for Every Pet with Data" project in collaboration with No Kill Colorado, using Excel for data cleaning and validation, Python for geocoding addresses from the PACFA list, and tools like pandas and geopy to enrich datasets for animal welfare advocacy. .
- Actively engaged in the community Slack channel, volunteering on ad-hoc data projects focused on non-profits and social impact as opportunities arise.

Messari Bounty Contributor

April 2025 Remote

- Built a Python-based Crime Fighting AI Toolkit for Solana, analyzing API data to detect suspicious tokens with a normalized suspicion score, enhancing fraud detection capabilities.

RevGenius Member

2024 – Present Remote

- Engaged in a community focused on revenue growth, networking with professionals to share insights on growth strategies..

Education

University of Port Harcourt

Bachelor of Science in Industrial Chemistry 2018 – 2022

- Focused on analytical techniques and data interpretation, building a foundation for data analysis.

Skills

- **Technical**:SQL, Python, Data Visualization, Web Scraping, API Integration, Tableau/PowerBI, Excel, Data Entry, Sentiment Analysis, Predictive Modeling, Automation Workflows
- **Soft**: Storytelling, Communication, Analytical Thinking, Collaboration, Problem-Solving

Certifications

- Data Analytics Essentials – Cisco Networking Academy
- Data Analysis with Python – freeCodeCamp
- Inbound Sales – HubSpot Academy
- Email Marketing – HubSpot Academy
